CERTIFICATE OF COMPLIANCE

RESTRICTION OF HAZARDOUS SUBSTANCES (RoHS 3) FOR POLYAMIDE 12 & XENOY MATERIALS

Spears® Manufacturing Company certifies that its CLIC Top and CLIC Economical products are produced using the highest quality Polyamide 12 and Xenoy co-polymer compounds are in compliance with the criteria as set forth in the RoHS Directive 2011/65/EU as amended by Directive (EU) 2015/863 (RoHS 3).

Based on information provided to Spears® Manufacturing Company by its raw material suppliers, the Polyamide 12 and Xenoy co-polymer compounds used in Spears® Clic products does not contain the following RoHS restricted substances:

Cadmium (Cd), Mercury, Lead (Pb), Hexavalent Chromium (Cr6+), Polybrominated biphenyl (PBB), Polybrominated diphenyls ethers (PBDE).

Additionally, Spears® CLIC products do not contain PAH (polycyclic aromatic hydrocarbons), Pentabromodiphenyl ether, Octabromodiphenyl ether or Decabromodiphenyl ether. Spears® further certifies that PAH materials are not knowingly added or used in the production of its products.

This is based on information from our supplier.
